

Requirements to run the executable

- Requires JDK22 to be installed
- Runs on Windows and Mac

How to build the executable

This is outlined in the video provided.

1. In IntelliJ, go to File -> Project Structure -> Artifact -> + -> JAR -> choose main and create.
2. Go to Build -> Build Artifact -> Click on JAR Artifact created above -> Build

References

I acknowledge the use of ChatGPT (<https://chat.openai.com/>) to generate images to be used as graphics for Dragon Card and Creatures as part of the application that were included within my Sprint 2 submission in modified form. I entered the following prompts on 25 April 2024:

- “Create me an image for a dragon card for a board game”
- “Create an image for a Baby Dragon, Salamander, Pirate Dragon, Spider and Spider”
